

RANGER WHEELCHAIRS  
**MDX**

A super compact, mid-wheel drive power base, the Ranger MDX (short for Mid-Wheel Drive Cross-Over) boasts superior climbing ability while retaining ultimate stability. The key is an industry first, seating-base integration design which links the user directly to the function of the articulating frame.

Like no other power chair, the MDX provides a response that adapts with the situation; accelerate over an obstacle and feel the front wheels lift and suspension compress, but should you experience a sudden stop or a steep downhill slope, the frame stabilizes to hold you in place. Combine that with the industry's smallest footprint on a full size power base and you have a something truly special.

Being exceptional isn't just thinking outside the box... it's redesigning the box entirely.

**HIGHLIGHTS**

- High Speed 2-Pole Motors
- R-net or VR2 Controls from PG Drives
- Seating Integrated Drive Wheel & Front Caster Suspension
- Pull-out Front Tray for Easy Battery Access
- GR22 Batteries

**STANDARD FEATURES**

- Made-to-order Modular Seating Options
- Super Durable, Reinforced Steel Frame
- Resilient Fibreglass Shroud
- Standard enclosed Quad-Link Joystick Mount
- Custom Power Seating Functions

**SPECIFICATIONS**

- Speed.....6.5 mph
- Base Size.....23.5" x 32"
- Weight Limit.....300 Lbs
- Lowest Seat Height.....16.5"
- Height w/ CG Tilt.....18.5"
- Drive Wheel.....13" x 3"
- Caster Wheel.....9" x 2.5"
- Base Weight.....215 Lbs

**SEATING OPTIONS**

- Adjustable Rehab (15"-22" width)
- Pediatric (12"-16" widths)
- Precision (up to 22" widths)
- \*Precision Seat required for custom power seat functions
