

YUKON

RANGER WHEELCHAIRS

The 904 Yukon is an extreme performance version of our 904S power base, which features a frame and gear system designed for a rugged outdoor application, yet with surprisingly responsive handling and a compact footprint. We also now offer an XC version with 16" X 7.5" Knobby ATV style tires for off road.

Designed for those instances when the question is, "You want your power chair to go WHERE?!" the Yukon tackles gravel, mud, snow, sand and pretty much anything it feels like. Built originally for a resident of the Yukon territory it has become an essential tool for farmers, outdoor enthusiasts, and Para-Olympic Gold Medalist Equestrian trainers.

When you need a chair that is as exceptional as you are.
